Source for all performance data: Anevis Solutions GmbH, own illustration. As at: 02/05/2024.

The Funds are actively managed by DJE and, where a benchmark index is indicated, without reference to it. The presented charts and tables concerning performance are based on our own calculations according to the gross performance (BVI) method² and illustrate past development. Past performance is not indicative for future returns. The BVI method takes into account all costs incurred at the fund level (e.g. management fees), the net performance and the issue fee. Additional individual costs may be incurred at the customer level (e.g. custodian fees, commission and other charges). Model calculation (net): an investor wishes to purchase shares for Euro 1,000. With a maximum issue surcharge of 0.00%, he has to spend a one-off amount of Euro 0.00 when making the purchase. In addition, there may be custodian costs that reduce performance. The custodian costs are decided by your bank's price list and service charges

DJE - Concept XP (EUR)

Feeder fund for the FMM-Fonds

**Investment Approach**

DJE - Concept invests its fund assets in units of the FMM-Fonds. This fund is an investment concept which is managed independently of any benchmark constraints with the aim to achieve an optimal risk/reward profile. The basis is the three-dimensional FMM-methodology, which was developed by Dr Jens Ehrhardt and has a proven track record of more than 45 years. According to the methodology the following factors are taken into account: (F)undamental factors like micro- and macroeconomic data for corporations and economies, but also (M)onetary and technical (M)arket aspects such as sentiment which are often neglected by other fund managers. Fundamental factors play a more important role in the long-term strategic orientation of the portfolio than, for example, technical market factors. The latter are more significant for the fund's short-term, tactical positioning. In normal market phases, the FMM-Fonds focuses on current trends. In extreme situations (such as during euphoric phases), the fund can also follow an anticyclical investment strategy.

The essential parts of the FMM methodology

Opportunities

- + The opportunities of the global equity and bond markets may be used – the fund is not restricted to one region or country
- + Experienced fund manager following an investment approach based on fundamental, monetary and market-technical (FMM) analysis, which has a proven track record since 1974
- + Efficient mixture of equities and bonds with strategic risk diversification

Risks

- Equities may be subject to significant price falls
- Price risks of bonds when interest rates rise
- Currency risks resulting from the portfolio's foreign investments
- Issuer country, credit and liquidity risks

DJE - Concept XP (EUR)

Feeder fund for the FMM-Fonds

**Fund Manager****Dr. Jens Ehrhardt**

Responsible Since 05/12/2017

Dr Jens Ehrhardt is the founder and CEO of DJE. He received his doctorate in 1974, the same year he founded today's DJE Kapital AG, which he has managed from the outset. From his doctorate, he developed the DJE investment method, FMM, which has been continuously refined to this day and takes fundamental, monetary and market indicators into account.

DJE Kapital AG

DJE Kapital AG is part of the DJE Group, can draw on around 50 years of experience in asset management and is today one of the leading bank-independent financial service providers in German-speaking Europe. Our investment strategy, both in equities and bonds, is based on the FMM method developed in-house: a systematic analysis which takes three views on securities and the financial markets – fundamental, monetary and market-technical. DJE follows sustainability criteria when selecting securities, takes into account selected sustainable development goals, avoids or reduces adverse sustainability impacts and is a signatory to the United Nations "Principles for Responsible Investment".
