### Investment Strategy

This fund focuses its investments on bonds from domestic and foreign issuers, participation certificates, convertible bonds and warrant bonds. Domestic and foreign stocks may comprise up to 20% of fund assets. This level can be tactically increased by 10% through the use of derivatives. Overall the fund maintains a balanced mix of securities with the goal of achieving a reasonable return. The focus of investments is on high-quality bonds. In selecting equities, the fund managers analyse companies using quantitative and qualitative criteria.

The Funds are actively managed by DJE and, where a benchmark index is indicated, without reference to it. The presented charts and tables concerning performance are based on our own calculations according to the gross performance (BVI) method<sup>2</sup> and illustrate past development. Past performance is not indicative for future returns. The BVI method takes into account all costs incurred at the fund level (e.g. management fees), the net performance and the issue fee. Additional individual costs may be incurred at the customer level (e.g. custodian fees, commission and other charges). Model calculation (net): an investor wishes to purchase shares for Euro 1,000. With a maximum issue surcharge of 0.00% , he has to spend a one-off amount of Euro 0.00 when making the purchase. In addition, there may be custodian costs that reduce performance. The custodian costs are decided by your bank's price list and service charges

## DWS Concept DJE Alpha Renten Global FC

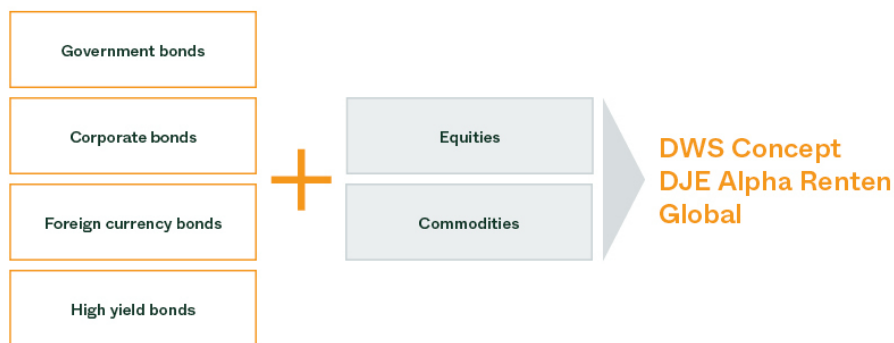

Focuses worldwide bonds for constant yields

### Investment Approach

The fund takes advantage of the cyclical interplay between the asset classes bonds and equities. The focus is on international bonds, both corporate and government bonds, in various currencies. The fund also takes advantage of selected opportunities on the equity markets. This allows it to diversify when bonds are temporarily weak and to achieve a positive long-term performance. The allocation between equities, bonds and cash as well as the analysis of the equity and bond markets is based on the FMM method, the proven investment approach of DJE Kapital AG (for more information on the FMM method, please visit [www.dje.de](http://www.dje.de)). The broad diversification across different asset classes forms the basis for a favourable risk/return ratio.

### Key investment components

Source: Bloomberg

### Opportunities

- + Participation in a balanced portfolio of equities, bonds and foreign currencies
- + The fund frequently makes full use of the equity investment option to profit from rising equity markets
- + Our professional team takes advantage of the opportunities offered by volatile markets

### Risks

- Equity prices may exhibit relatively strong fluctuations depending on market conditions
- Issuer country and credit risks as well as currency risks
- Price drops in the money and capital markets when interest rates rise

### Fund Manager

**Dr. Jens Ehrhardt**

Responsible Since 01/12/2012

Dr Jens Ehrhardt is the founder and CEO of DJE. He received his doctorate in 1974, the same year he founded today's DJE Kapital AG, which he has managed from the outset. From his doctorate, he developed the DJE investment method, FMM, which has been continuously refined to this day and takes fundamental, monetary and market indicators into account.

**Peter Lechner**

Responsible Since 15/02/2022

Peter Lechner joined DJE in 2020. The bond specialist is responsible for trading and implementing investment strategies in mutual and special funds in all asset classes. He is co-fund manager of DJE - Short Term Bond, DWS Concept DJE Alpha Renten Global and manager of other institutional special funds.

### DJE Kapital AG

DJE Kapital AG is part of the DJE Group, can draw on 50 years of experience in asset management and is today one of the leading bank-independent financial service providers in German-speaking Europe. Our investment strategy, both in equities and bonds, is based on the FMM method developed in-house: a systematic analysis which takes three views on securities and the financial markets – fundamental, monetary and market-technical. DJE follows sustainability criteria when selecting securities, takes into account selected sustainable development goals, avoids or reduces adverse sustainability impacts and is a signatory to the United Nations "Principles for Responsible Investment".

### Monthly Commentary

Due to the high volatility on the interest rate side, the capital commitment period in the bond portfolio was dynamically managed using interest rate derivatives. Most recently, the modified duration including derivatives was 2.59 years (after 2.45 years at the end of May). The cash ratio totalled 12.35%. In the bond portion of the fund, supranational bonds denominated in Mexican pesos were reduced due to the weak market performance and a bond from the chemicals sector denominated in euros was subscribed via the primary market. The equity allocation was also actively adjusted by means of derivatives. At the end of the month, the equity allocation was 16.23% after 14.29% at the end of May (exposure including derivatives). Shares in companies from the banking and commodities sectors were sold. In contrast, stocks from the tourism sector were built up. In the technology sector, there was profit-taking and new investments. Gold is currently allocated to the fund at 2.07%. The USD exposure was partially hedged through the use of derivatives. The DWS Concept DJE Alpha Renten Global achieved a monthly performance of 0.67%.
